CRANES & HOIST CO.

AN ISO 9001:2015 CERTIFIED COMPANY

About us

Hindustan Crane & Hoists is a leading manufacturer and supplier of high-quality E.O.T. & H.O.T. Cranes, Hoists, Goods Lifts, Jib Cranes, and Braking Systems. With years of experience in the industrial lifting sector, we are committed to delivering robust, reliable, and efficient material handling solutions tailored to meet the diverse needs of our clients.

At Hindustan Crane & Hoists, we combine precision engineering, quality materials, and modern technology to ensure safety, durability, and performance in every product we deliver. Our solutions are trusted by industries such as manufacturing, steel, cement, warehousing, construction, and shipbuilding.

At Hindustan Crane & Hoists, our mission is to empower industries with safe, efficient, and cost-effective lifting solutions. Our vision is to be recognized as a trusted leader in industrial cranes and hoists, setting benchmarks in quality, reliability, and innovation.

SINGLE GIRDER EOT CRANE

The Single Girder Electric Overhead Traveling (EOT) Crane, manufactured by HINDUSTAN CRANE & HOIST CO., is a reliable and cost-effective material handling solution designed for light to medium-duty lifting operations. Built with in-house manufacturing and precision engineering, it features a single robust bridge girder supported on end carriages for smooth and stable travel along runway rails. Its compact design ensures optimal space utilization, even in facilities with limited headroom. Strong construction, easy operation, and low maintenance requirements provide long service life, reduced operating costs, and improved productivity.

JIB CRANE

Our Jib Cranes are designed to provide efficient and reliable material handling solutions for localized lifting operations.

Built with a strong vertical pillar and a robust horizontal boom, our jib cranes ensure smooth rotation and precise load handling within a defined working radius. They are ideal for quick lifting, loading, unloading, and workstation support applications.

Suitable for workshops, warehouses, fabrication units, assembly lines, and small manufacturing plants, these cranes improve workflow efficiency while reducing manual effort.

GOLIATH CRANE

Our Goliath Cranes are engineered to handle heavy-duty outdoor and indoor material lifting operations with superior strength and stability.

Built with robust steel legs running on ground-mounted rails and a heavy-duty bridge girder structure, our Goliath cranes ensure smooth movement, precise load control, and reliable performance across large working areas.

Ideal for shipyards, construction sites, steel plants, railway yards, precast yards, and large fabrication units, these cranes are designed to lift and transfer heavy materials efficiently and safely.

Manufactured using premium-grade steel and advanced hoisting technology, Hindustan Crane & Hoist Goliath Cranes deliver exceptional durability, weather resistance, and long service life even in demanding industrial environments.

Available in single girder and double girder designs, our Goliath cranes can be customized as per load capacity, span, height, and operational requirements – making them a powerful and cost-effective solution for large-scale industrial lifting needs.

SEMI GOLIATH CRANE

Our Semi Goliath Cranes are precisely engineered to provide powerful, flexible, and space-efficient material handling solutions for demanding industrial environments. Designed with one side supported by an elevated runway beam and the other side traveling on ground-mounted rails, these cranes offer exceptional structural stability with optimized floor space utilization.

Built for both indoor and outdoor applications, Semi Goliath Cranes deliver smooth travel motion, accurate load positioning, and superior operational control across extended work areas. Their hybrid design makes them ideal where full gantry installation is not feasible but heavy-duty lifting is required.

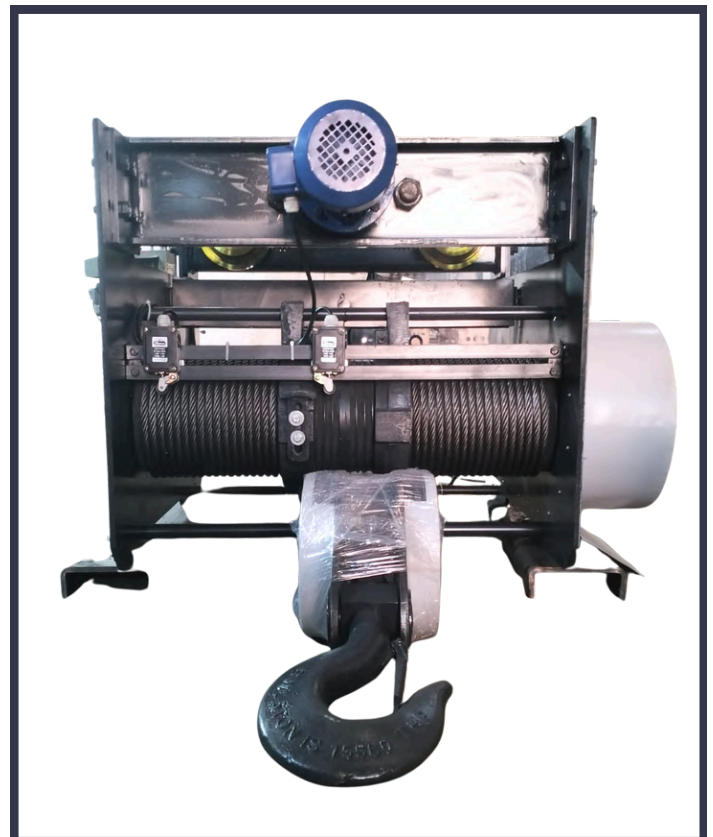

Supported by a robust steel leg on one side and an overhead structure on the other, our semi goliath cranes ensure controlled movement, high load-bearing strength, and reliable long-term performance even in challenging industrial conditions.

These cranes are widely used in fabrication workshops, steel plants, warehouses, railway yards, shipbuilding units, infrastructure projects, and heavy engineering industries where versatility and efficiency are essential.

ELECTRIC WIRE ROPE HOIST

The Electric Wire Rope Hoist is designed for efficient, safe, and reliable lifting of heavy loads in industrial applications. Manufactured with robust construction and precision engineering, it ensures smooth operation, high load capacity, and long service life. Equipped with advanced safety features, it provides secure and controlled lifting. Ideal for EOT cranes, workshops, factories, and material handling systems, the hoist delivers consistent performance with minimal maintenance.

ELECTRIC CHAIN HOIST

The Electric Chain Hoist is specially designed for safe, smooth, and efficient lifting operations in industrial environments. Manufactured with high-strength alloy steel load chain and robust construction for long service life. Ensures stable lifting performance with low noise and minimal vibration.

Equipped with safety features such as overload protection, limit switch, and emergency stop. Suitable for EOT cranes, jib cranes, workshops, warehouses, and material handling systems. Provides reliable performance with low maintenance and high operational efficiency.

END CARRIGE

L BLOCK END CARRIAGE

ELECTRO-HYDRAULIC THRUSTER BRAKE.

The Electro-Hydraulic Thruster Brake delivers precise and reliable braking for cranes and hoists. Combining electrical and hydraulic technology, it ensures smooth operation, long service life, and minimal maintenance. Ideal for EOT cranes, hoists, and heavy-duty material handling, it provides maximum safety, stability, and operational efficiency in industrial applications.

C-HOOK FOR COIL LOADING & UNLOADING

The C-Hook, manufactured by HINDUSTAN CRANE & HOIST CO., is designed for safe and efficient handling of steel coils during loading and unloading operations. Built with robust construction and precision engineering, it ensures stable, secure, and smooth lifting of heavy coils. Ideal for steel plants, warehouses, and industrial material handling applications, the C-Hook improves operational efficiency, safety, and productivity.

ELECTRICAL GOODS LIFT

Our Electrical Goods Lifts are designed for efficient and safe vertical transportation of materials in factories, warehouses, and industrial buildings. Built with robust construction and smooth operation, these lifts handle heavy loads reliably, reducing manual labor and improving workflow. Equipped with advanced safety features and durable motors, they ensure consistent performance and long-term reliability. Ideal for industrial, commercial, and storage applications, our goods lifts are a trusted solution for material handling.

HOISTING GEAR BOX

Designed for smooth and reliable operation of cranes and hoists.

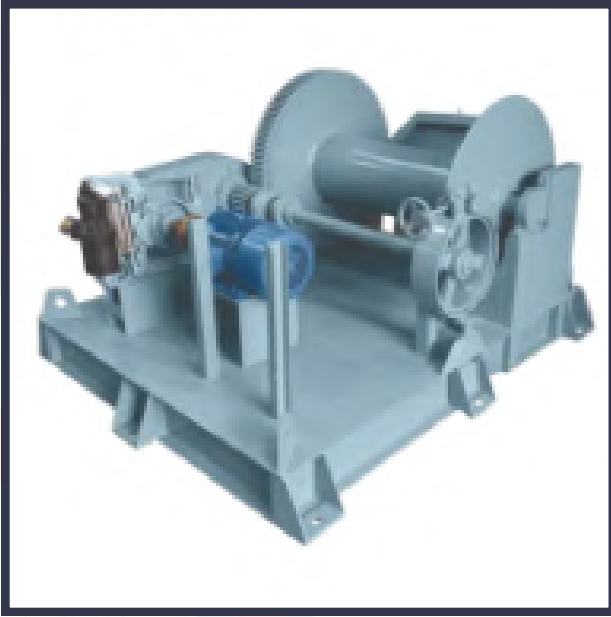

High torque and durable construction ensure long service life.

Provides efficient and precise lifting performance for heavy loads.

Ideal for industrial cranes, EOT systems, and heavy-duty material handling.

Engineered to meet the highest standards of safety and reliability.
